

*You are invited to our Soils CRC partnership webinar*

# Improving soil health with a focus on plants

Grant Sims and Declan McDonald will share their stories and experiences of improving soil health, primarily with the use of plants. They will discuss soil outcomes that have been achieved, what this means for production and how this information is being shared and received by landholders.

We are excited to have Robin Tait to facilitate this Zoom meeting. Robyn is a 2018 Tasmania Nuffield Scholar who is passionate about farming in a way that supports a healthy soil ecosystem.

#### About the speakers:

Declan McDonald is the Principal Soil Scientist with Regen Soils. The focus of Declan's work in regenerative agriculture is to maximise the productive capacity of the soil through promotion of biological activity supported by carefully selected fertilisers and organic inputs.

Grant Sims is a sixth generation farmer from North Central Victoria, and former President of Vic No Till. Grant and his family focus on soil biology and managing inputs while raising cash crops, year-round cover crops, and sheep and cattle on their farming operation.

## Tuesday 17 November

### 8am-9.15am via Zoom

RSVP to [phoebegulliver@holbrooklandcare.org.au](mailto:phoebegulliver@holbrooklandcare.org.au)  
or to the HLN office 02 6036 3181 & we'll send you the Zoom link
