

DECIPHERAG LAB

What is DecipherAg Lab?

DecipherAg Lab is a customisable subscription exclusive to CSBP Lab for managing nutritional farm data for multiple clients in one place. Bring your clients and team together with a simple and centralised platform.

CSBP Soil and Plant Laboratory customers receive a complimentary DecipherAg Lab (Free) subscription.

Manage sampling with DecipherAg Lab (Free)

A DecipherAg Lab (Free) account makes it easy for your team to manage, plan and assign sampling jobs for multiple clients. Features include;

- Single site or multisite (transect) sampling options.
- Geolocate and submit samples to CSBP Lab using DecipherAg Mobile.
- You can customise your lab test package to meet your needs, making sample planning quicker and easier.

Upgrade your DecipherAg Lab subscription to Biomass+

Upgrade your DecipherAg Lab subscription to Biomass+ to access the advanced features for all your clients. The advanced features include;

Imagery

- Clip imagery to farm or paddock to create, view, manage, and save management zones.
- Compare biomass imagery between farms and seasons.
- View MSAVI, NDVI, NDRE imagery, and Available Water Capacity.

Zones

- Create and edit zones from biomass imagery.
- Create fertiliser prescription files to import into your machine for in-field variable rate application.

Sample results

- Compare and monitor nutrient levels graphically.
- Customise your target nutrient value for your region/crop type.
- Create, manage, and visualise your crop and pasture nutritional plans with your customised product list and application rates.
- Revise and save the actual fertiliser and soil amendments rates applied

Biomass+ pricing

A Biomass+ DecipherAg Lab subscription is for 12 months for a fixed fee of mapped hectares.

- \$1000 (ex GST) per annum for up to 10,000 mapped hectares
Add \$200 for every additional 10 000 mapped hectares. For example;
- \$1200 (ex GST) per annum for up to 20,000 mapped hectares.
- \$1400 (ex GST) per annum for up to 30,000 mapped hectares.

DecipherAg Yield Data to gain more insights

Add a 12-month DecipherAg Yield Data subscription to the individual Biomass+ linked accounts.
