Farm-scale Natural Capital Accounting

Valuing Natural Capital on your farm

The Farm-scale Natural Capital Accounting project team invites you to a field day to demonstrate *how* farm-scale natural capital accounts are produced, *what's* in them, and *why* producers should know about them. This will be an opportunity to see natural capital accounting *in action*, including how natural capital is assessed in the field, what the accounts look like and how they can be used.

Please join project leads, Jim Radford and Alex Maisey from La Trobe University and Danny O'Brien from Integrated Futures for a pleasant Sunday morning talking all things Natural Capital Accounting.

Location: [Woomargama Station](#), Tunnel Rd, Woomargama, NSW

To register: Go to <https://events.humanitix.com/farm-scale-natural-capital-accounting-field-day> or scan the QR code →

For details contact: Kylie Durant: (02) 6036 3181 or Jim Radford: 0400 815 811
