

Biological Control Workshop

Biological control is a reliable, cost-effective and well-researched method of managing some of NSW's most environmentally destructive weeds.

This free workshop is suitable for everyone from council weed officers to landholders or anyone interested in local weed biocontrol options.

Dr Andrew Mcconnachie, Senior Research Scientist in the Weeds Research Unit at NSW Department of Primary Industries will cover:

- an introduction to biocontrol theory
- current research and availability of local biocontrol agents
- biocontrol agent rearing and releasing best practice
- assisting with the monitoring of your local biocontrol agents in the field.

Lunch will be provided.

For more information, please contact:
Michael Tweedie, Regional Weeds Coordinator on 0448 390 288 or email michael.tweedie@lls.nsw.gov.au

This workshop is jointly hosted by Local Land Services and NSW Department of Primary Industries
